1. **Remove radiator side shrouds**
2. **Remove existing plastic radiator louvers**
3. **Line up guards with tabs on outside of radiator and push guard towards frame to seat into outside grooves. (FIG 1)**
4. **Mount guards to frame using supplied M6x16 bolts and washers. Check to ensure the guards are seated in the outside grooves.**
5. **Re-install side shrouds using stock mounting hardware. Tip: Remove shroud washers from shroud and place on bolts before re-install (FIG 2) This will make the install much easier.**
